[19]"Do not store up for yourselves treasures on earth, where moth and rust destroy, and where thieves break in and steal. [20]But store up for yourselves treasures in heaven, where moth and rust do not destroy, and where thieves do not break in and steal. [21]For where your treasure is, there your heart will be also.
[22]"The eye is the lamp of the body. If your eyes are good, your whole body

will be full of light. [23]But if your eyes are bad, your whole body will be full of darkness. If then the light within you is darkness, how great is that darkness!
[24]"No one can serve two masters. Either he will hate the one and love the other, or he will be devoted to the one and despise the other. You cannot serve both God and Money.

Do Not Worry

[25]"Therefore I tell you, do not worry about your life, what you will eat or drink; or about your body, what you will wear. Is not life more important than food, and the body more important than clothes? [26]Look at the birds of the air; they do not sow or reap or store away in barns, and yet your heavenly Father feeds them. Are you not much more valuable than they? [27]Who of you by worrying can add a single hour to his life[b]?
[28]"And why do you worry about clothes? See how the lilies of the field grow. They do not labor or spin. [29]Yet I tell you that not even Solomon in all his splendor was dressed like one of these. [30]If that is how God clothes the grass of the field, which is here today and tomorrow is thrown into the fire, will he not much more clothe you, O you of little faith? [31]So do not worry, saying, 'What shall we eat?' or 'What shall we drink?' or 'What shall we wear?' [32]For the pagans run after all these things, and your heavenly Father knows that you need them. [33]But seek first his kingdom and his righteousness, and all these things will be given to you as well. [34]Therefore do not worry about tomorrow, for tomorrow will worry about itself. Each day has enough trouble of its own

Children require guidance and sympathy far more than instruction

—Anne Sullivan

Children are not just the people under ten. We are all children at heart. And in many of the activities that call us we are as uncertain of the steps to take, as unsure of the outcomes' course, as any ten-year-old. No matter the age, what we all need in the midst of any challenge is soft comfort from a loved one and gentle probing questions that serve to guide our choices as we move ahead with the task

Giving someone explicit directions about how to proceed can deprive them of opportunities for discovery. Stumbling is part of the human experience. Picking ourselves up allows us an additional glance at the landscape on which we tripped. In the second glance comes a new understanding and thus the growth the gift of life has promised us

I'll comfort another child today and willingly accept the guidance offered by my own mentor

TO ACHIEVE ALL THAT IS POSSIBLE,
WE MUST ATTEMPT THE IMPOSSIBLE.
TO BE AS MUCH AS WE CAN BE,
WE MUST DREAM OF BEING MORE.

OUR DREAMS ONLY COME TRUE WHEN WE FIND THE COURAGE AND STRENGTH INSIDE OURSELVES TO CATCH THE STARS THAT FALL IN FRONT OF US.

TO ALL OF MY GOOD FRIENDS, YOU WILL ALWAYS BE IN MY HEART AND MEMORIES AND THE BEST OF LIFE AND HAPPINESS TO YOU ALL.

I dreamed I saw a second sun. It roared and fell a mighty earth with all the power of music in its palms. I felt it engulf me, and it was warm but for a small area where another person had been. I stayed there until noon, then came out and it smelled as though it had just rained. Then I knew I was the last man on Earth. But it was not to be, for I awoke.

Awareness Day 1988

an average day, simply stated

I'm most of time really angry!

Most of my time is spent thinking and
the other half is spent thinking of why I think so much.

When I'm not sleeping I'm either sitting and staring into space or walking and wandering aimlessly in an attempt to justify what I do and figure out who I am and where I am going.

Sleeping, eating — major priorities.
Mostly doing errands and trying to negotiate time — a lot of TV.

4 and a half + hours spent trying to be avant garde.

Life at RISD is waiting to finish too much work.

130 hours a week freaking out
38 hours a week drinking and drugs

It was necessary to turn inward, to the means of art, the materials and techniques with which art is made. Artists still interested in painting began

pocket in two, with the help of a few safety-pins let us say, to quadruple them seemed to be more than I could manage. And I did not feel inclined to take all that trouble for a half-measure. For I was beginning to lose all sense of measure, after all this wrestling and wrangling, and to say, All or nothing.

SO YOU THINK YOU KNOW HOW TO USE A CONDOM?

Since condoms leak or break, they aren't a sure guarantee against transmission of the "AIDS virus". However, they do reduce your risk, and, used properly, they rarely break. Some simple do's and don't's of condom usage are:

DO *Put the condom on BEFORE you enter your partner.*

DO *Make sure there is no air in the condom, including the tip.*

DO *Use plenty of water-based lubricant. (Examples: K-Y jelly, For-Play, PrePair, and Probe) NEVER USE SALIVA!*

DO *Hold on to the base of the condom when you're pulling out after intercourse to prevent it from coming off inside your partner.*

DO *Use a fresh condom each time you have sex.*

DON'T *Use oil- or petroleum-based lubricants. (Examples: Baby Oil, Vaseline, Vaseline Intensive Care, Elbow Grease, Crisco)*

DON'T *Use old or misused condoms. (For example, condoms you've kept in your wallet.)*

DON'T *Wait until halfway after you begin sex to put a condom on.*

DON'T *Blow a condom up to test it. This weakens them.*

DON'T *Re-use condoms EVER!*

THE A-B-C'S OF PUTTING ON A CONDOM

←A *Gently squeeze the tip of the condom with one hand, making sure there is no air in the tip. (This leaves room for the semen when you ejaculate [cum], and forces out any air bubbles, which are a major reason condoms break.)*

While you continue to squeeze the tip of the condom, forcing out any air, begin to unroll the condom down the length of your penis...

→B

←C *...carefully unrolling it all the way down to the base of your penis to the hair.*

The Tightropewalker selects two points above ground and connects them with a rope. At the outset his center of gravity is located above the hollow of his stomach. While moving across the rope he con- tinuously counteracts any displacement of that center of gravity.

Beginning with the lifting of one foot to be placed in front of the other, until he feels again the pressure of his weight underneath, a series of movements are executed. The balancing pole acts as an extension of himself to retrieve the center of gravity should it fall outside of his body.

The continuous swaying of the rope challenges his ability to keep the resultant of all downward forces in line with his center of gravity. Each step on the rope differs from the next. Countless and unpredictable factors demand his full awareness along the way to overcome that which makes him fall.
